

PROTECTING MARATHON'S WATER RESOURCES

Deep Injection Well Phase 3A Transmission Main Project

City of Marathon, Florida

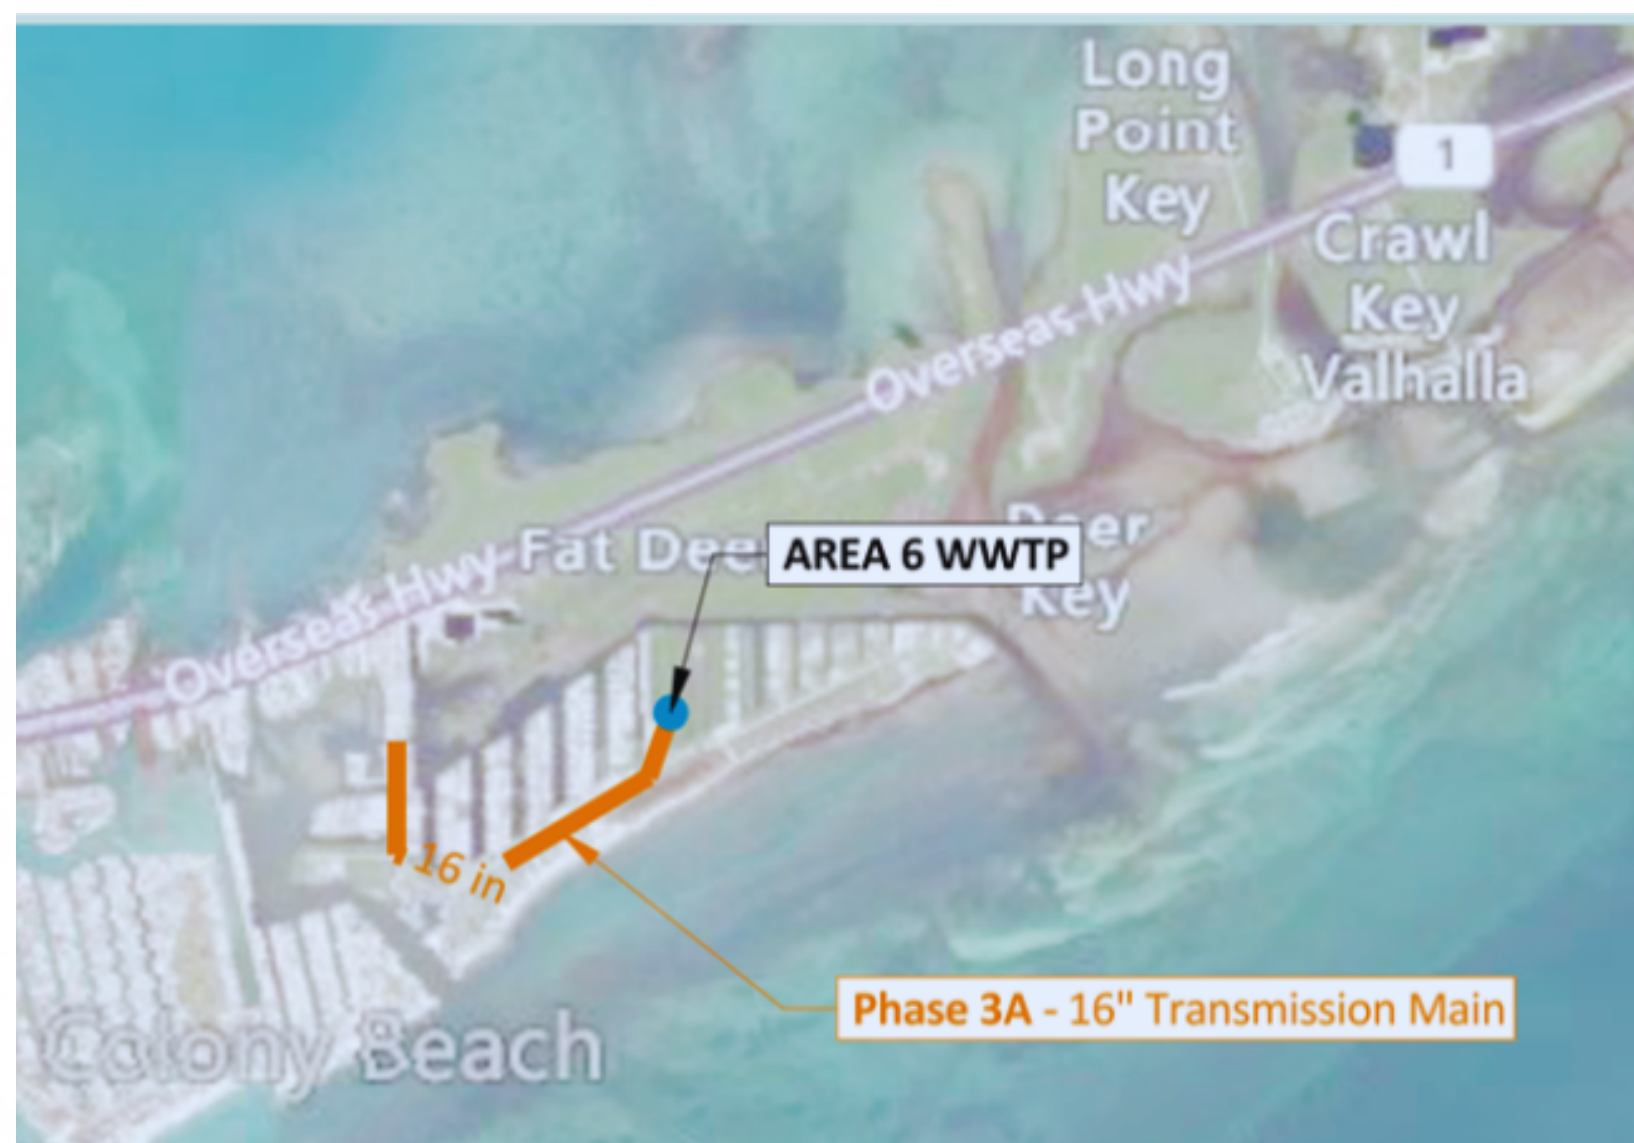

The City of Marathon is constructing the Deep Injection Well Phase 3A Transmission Main Project to improve wastewater transmission infrastructure and support the City's long-term treated effluent disposal system.

FUNDING

This project is financed in part by the Clean Water State Revolving Fund (CWSRF). The CWSRF program is administered by the Florida Department of Environmental Protection with joint funding from the U.S. Environmental Protection Agency and the State of Florida.

PROJECT OVERVIEW

- \$2.4 million construction contract for nearly 1 mile of 16-inch pipeline improvements via directional drilling, extending from the Robert H. Dopps Memorial Bridge along Coco Plum Drive to the Area 6 Wastewater Treatment Facility.

WHY THIS PROJECT MATTERS

- Improves reliability of the treated effluent transmission system
- Supports long-term wastewater disposal capacity
- Helps protect groundwater, nearshore waters, and marine resources
- Strengthens infrastructure resiliency for residents, businesses, and visitors
- Supports environmental compliance and public health protection

Clean Water State Revolving Fund programs help communities maintain and improve the infrastructure needed to protect valuable water resources nationwide. For more info, visit: epa.gov/cwsrf
