Customer –

Synagro has been proud to be your biosolids provider for many years. We value the relationship and the opportunity to serve you and your community.

2022 has been an unprecedented year. The pandemic, trucking shortage, supply chain crisis, labor shortage, and global fuel situation have caused some of our input costs to increase at levels not seen in decades. As an example, industry-wide polymer costs are up 40% since the beginning of the year, and fuel is up 50% over the same time-period.

To offset these costs, effective June 1st we are implementing a fuel surcharge of 10% and polymer increase of 8% to the total invoice amount. This price is not to increase our profit margins, it is simply a pass-through of rapidly rising costs that are beyond our control. This price increase is tied to known industry indexes and will be re-evaluated in 6 months. We will lower the pass-through amount if these commodities become less expensive.

Thank you for your business, and for your understanding as we navigate our way through these difficult economic times. If you have any questions, please feel free to contact me at sreel@synagro.com.

Thank you,
